

MD ABIR

M.Sc. Data Science | AI Automation Engineer | LLM & AI Systems

+49 176 76922422 | abirkhan88821@gmail.com | md-abir.vercel.app

PROFESSIONAL SUMMARY

M.Sc. Data Science student at FAU Erlangen-Nürnberg and Student AI Automation Engineer at the Hasso Plattner Foundation (HPF), with hands-on experience designing and implementing LLM-powered applications, agentic workflows, workflow automation, and human-centered AI systems. Strong background in Python, software engineering, prompt engineering, LLM integration, APIs, and data-driven product development. Experienced in taking AI applications from concept and architecture through implementation and evaluation. Particularly interested in trustworthy LLM systems, human-AI interaction, dialogue systems, and AI applications in healthcare and biomedical environments.

TECHNICAL SKILLS

AI & LLM Systems: LLM APIs, Prompt Engineering, Agentic Workflows, NLP, AI-Assisted Development, Machine Learning, TensorFlow, OpenCV

Programming & Data: Python (Pandas, NumPy), SQL, JavaScript, Data Analysis, Data Preparation, REST APIs

Automation & Integration: n8n, Zapier, API Integration, Webhooks, Git/GitHub, GitLab, Docker, OAuth & SSO

Human-Centered AI & Development: Human-Computer Interaction, UX Design, Full-Stack Development, Data Visualization

WORK EXPERIENCE

Student AI Automation Engineer | Hasso Plattner Foundation (HPF) — Potsdam/Berlin, Germany | 2026 – Present

- Design and implement AI-powered automation solutions and LLM-based applications for organizational workflows.
- Develop agentic workflows integrating LLMs, APIs, structured data sources, and automation platforms such as n8n.
- Prototype AI systems with emphasis on reliable outputs, structured workflows, human oversight, and practical deployment.
- Translate organizational requirements into technical AI architectures and working prototypes while collaborating with technical and non-technical stakeholders.

Technical Mentor — AI Lab Days | Hasso Plattner Foundation (HPF) — Berlin/Potsdam, Germany | Jun 2026

- Guided participant teams from open-ended business ideas to working AI prototypes presented on stage.
- Provided hands-on support with LLM APIs, prompt engineering, Claude Code, data preparation, Zapier, and n8n.

Co-Founder & Product Engineer | HiLinkz Ltd — Dhaka, Bangladesh | Dec 2019 – Dec 2025

- Designed and developed RyoGas, a digital platform for fuel stations to manage transactions, inventory, and operational data.
- Built backend data structures, reporting workflows, and automation features; collaborated across development, design, and business teams.

SELECTED AI PROJECTS

InvoxAI — AI-Powered Invoice Validation Platform | invoxai.plattner.com

- Developed an AI-assisted platform for validating organizational invoices against predefined rules, policies, and compliance requirements.
- Designed workflows that analyze invoice information and flag policy violations, inconsistencies, or cases requiring human review.
- Combined AI-based document understanding with structured validation logic to support traceable validation results and human oversight.

IELTSAnywhere — AI-Powered IELTS Practice SaaS | ieltsanywhere.com

- Built an end-to-end SaaS platform with LLM-based grading for Writing and Speaking, criterion-level feedback, and personalized recommendations.
- Implemented speech evaluation and progress analytics that transform user inputs into structured scoring and feedback.

RyoGas — Fuel Station Management System |

- Built mobile and backend systems using Flutter, Java, Firebase, and REST APIs with automated tracking of fuel sales and operational analytics.

EDUCATION

M.Sc. in Data Science | *Friedrich-Alexander-Universität Erlangen-Nürnberg (FAU)* | 2024 – Present

Relevant coursework: Artificial Intelligence in Biomedical Engineering; Human-Computer Interaction; Introduction to Control and Machine Learning; Data Science Survival Skills; Master's Seminar.

B.Sc. in Computer Science — CGPA 3.5 / 4.0 | *North South University — Dhaka, Bangladesh* | 2016 – 2021

RESEARCH PUBLICATION

- Counterfeit Medicine Identification Using Hyperledger-Based Private Blockchain — IEEE Conference Publication.

LANGUAGES

Bengali: Native | English: Fluent (B2–C2) | German: Beginner (A1)
